SUBJECT: March 29, 1988 Keystone RI/FS Public Meeting

DATE: APR 12 1988

FROM: Harold Yates  
Public Affairs Specialist (3PA00)

TO: E. Ann Cardinal, Supervisory  
Office of Public Affairs (3PA00)

Keystone Sanitation Remedial Site - The 250 plus turnout at the 3-9-88 RI/FS Work Plan Public Meeting provided a forum for a volume of legitimate comments that illustrated an extremely high level of local interest in the site, as well as a thoroughly conscientious commitment on the part of many local residents to be actively involved in the remediation effort. It was pointed out that many concerned parties were unable to review the work plans in the three local repositories because of the high demand. In response to this, the deadline for submitting written comments has been extended two weeks to April 29, 1988.

The meeting proceeded without interruption from 7:00 p.m. to 10:00 p.m. Michael Towles' presentation of the RI/FS, and Bruce Molholt's presentation of the site's health risk data were concise, and effective. Despite the extensiveness and depth of the comments, all questions were answered.

While the community involvement has been intense, the success of this Public Meeting can only be attributed to the expertise and dedication of the personnel assigned to this site. Keystone will continue to be a very sensitive site characterized by an active and capable citizenry. Remediation of this site and the maintenance of effective community relations will require continued, unrelenting labor and attention by our staff.
